

PRESS RELEASE

Crowsnest Pass Operational Services (Public Works) is implementing plans to improve overall efficiency and service delivery to community residents.

These plans include numerous functional changes that will see improved utilization of resources, improved efficiency and increased accountability.

The first step will be the consolidation of the Blairmore and Coleman shops into one facility which will be the Blairmore Facility. This facility will now be known as the Crowsnest West Facility, while Hillcrest facility, which also serves Bellevue, will be known as Crowsnest East Facility.

These changes will take place over a relatively short period of time and residents should be assured that service levels will not be reduced as a result of these changes.
